

Step-27: Puzzle

The purpose of a Puzzle is to learn how all the pieces fit into place, so there is no riddle, no joke, or any punch line, a Puzzle is something you need to figure out, using what you know is a fact, then find Laws that prove that is a fact, then move to the next level of that Puzzle, this Puzzle begins with what the United States Constitution said is a fact, only Congress can print Money, knowing the Federal Reserve does, proves Treason, now we are in the middle of this Puzzle, and you have no idea where this Puzzling Treason began, you know it was when Lincoln took out a loan using the United States Constitution as Collateral, so now you know where the Treason Puzzle begins, but see no ending to it, and that is because there is no end, other than the End of Time, and that is where this Puzzle begins, not at the beginning of time, but the beginning of this Puzzle, the End of Time.

A Puzzle is a Game, and the Game is to try to figure out what the Game is, all Games have Clues, so let us look at the Clues, we have the United States Constitution which states only Congress can print Money, we know from JFK what happens when the President gets Congress to Print Money, and if we go back in time to Jesus Bar Abbas the Leader of the Militia who defeated the Roman Empire for their use of Money & Taxation, and for 3 Centuries people lived without Money, till the Roman Empire changed its name to the Roman Church, which really what it was to begin with, as the Roman Soldiers found out after killing all the Church Leaders and its Members of Satanic Sheep, so now we have a Clue as to what this Game is all about, and that is Money, what the Torah said was the Root of All that is Evil, and why American's will commit Treason every-day of their Lives, and call it the best Country in the World, when did Treason make us the number 1 Country in the World, and how can you call Treason Freedom, the two are not compatible terms, so Witchcraft is being used to Trick you into believing that Treason is Legal, and the Constitution was Amended to allow Treason, and since we know their Legal System is designed to Enforce Treason, we know what this Game is all about, Crime, and behind most Crime is Money, people are addicted to it like it was a Drug, and Money Junkies will do anything for their next fix, so now we have our Clues to solve this Puzzle, now we need to know what kind of a Puzzle this is, and this is where this Puzzle begins.

I like to joke about my IQ, you can FOIA it, and find out it is over 180, otherwise this joke would not be funny, well to me anyway, being Autistic, I tend to figure out Puzzles given enough time, and time is always the key to figuring out Puzzles, some Puzzles Puzzle me, like Rubik Cubes, it was not till I learn it is all about remembering the moves, and why I was never good at those kind of Puzzles, and Women are normally better at finding Waldo, yet most Puzzles do not Puzzle me for long, if I have an Interest in them, I will figure them out, it occurred to me that most Puzzles center around Memorizing Sequences, and that is something I have a hard time doing, I cannot remember simple list, so I realized that my type of Memory is what the problem is, I can look at something, and remember all the details about it, I learned to use that ability to read Documents very fast, only I never did read them, I just look at the pages and stored all the

details of it in my mind, and somehow could figure out what it meant, maybe during dreams, not sure, after a Traumatic Brain Injury from the Anthrax Vaccine, I started having problems seeing things in my mind, everything became blurry to me, much like my eyesight, I went from having 20/10 vision to being legally blind without Glasses, and even with them I have a hard time seeing, so looking at Puzzles became harder to do, and I am not sure if my IQ went down with my issues in my head, Vertigo being a major problem, I found some Puzzles would trigger my Vertigo, not sure others have had this issue, my Vertigo is due to years of Vaccines and Antibiotics, I have Tinnitus so loud I cannot hear much, and I have lost three quarters of my hearing range from working around Jet Engines, so what I learned about Puzzles lately, is that there are many different types of Puzzles, and many different types of People, and everyone has a Puzzle that they are good at, and find more they are not good at, few people are good at all types of Puzzles, and memorizing repetitious movements, uses a different part of your Brain, we know most Lefthanded people like myself, can learn to write, and do most tasks Righthanded, but we cannot learn to be Righthanded, and why I grew up thinking I was righthanded because that was the way the Sister's with their Rulers would teach me, and only one of the reasons why I grew up not liking the Church, so taking this all into consideration, I realized the System put in place by those in Power, and those Enforcing Treason, are using a very special type of Puzzle to hide how they pulled this off the last 160-years and counting, this is called a Maze with Clues, and if you figure out all the Clues, you can get out of the Maze, and this is where most people are Clue-less, where people like me look for Clues, most none Autistic people, do not even think in terms of Clues to Solve the Puzzle, they use a brute force system of learning, whereas clues just slow down most Neurotypicals, or Normal People, and I know there are a lot of Autistic people with High IQ's, that are not talking about the Sky Falling or the End of Time, or Jesus coming back in their Flesh, other than Newton, so it is rare, and maybe the way I think is rare, and why I find it funny that those in power do not try to hide things from people with High IQ's, they know we will still find all the Clues, so why hide them, Normal people would not look for Clues, nor know how to look for them, so this Game was only designed for people who do not think like me, or Newton, considering he figured this out hundreds of years before I was born, and we were born on the same day of the year, and I find that funny as well, but Aspies have a strange sense of humor, and why we get this joke the Governments are playing on all of you, just because you are normal, and it is normal to have a low IQ, so this joke is on retarded people.

To figure out any Puzzle, you first need to know the rules of how the Puzzle works, when it comes to mazes, it comes down to how to get from point "A" to point "B", in the Trinary Universe we have a picture of a Galaxy that Henrietta Swan Leavitt looked at and studying other pictures taken by Edwin Hubble, she noticed something that she said puzzled her, but just because she said that, does not make it a puzzle, yet if we follow a maze, we know we have to remember all the things we have seen, and be able to distinguish them from what we see that is new, and our minds work well when trying to figure out puzzles, so when we write that things Puzzle us, we might mean we need to look at this as a Puzzle, and she was able to see a pattern, much like finding Waldo, and then the maze unraveled, as she realized she was looking at a disk with Suns orbiting around it, she saw corridors in space she said was part of this maze, Dark

Spots that seemed to push things into place, she figured out how the Galaxy works, and to her it was just something that puzzled her, so she made a puzzle out of it, so learning the rules about how a Puzzle works is the first thing you need to do, then change it into a type of Puzzle you can figure out, and you will learn how to figure out any Puzzle, by only knowing how a few work.

I think the reason I know more about Sir Isaac Newton than most people, is because of a long line of Ashkenazi going back to my Cousin Isaac Newton Flesher, who was named after Sir Isaac Newton, and what first got me interested in his notes, was a simple puzzle maze based on math, the Maze is like a Labyrinth, the two words are Witchcraft, because the two words are not the same, but close to the same, a Maze is normally drawn on paper, whereas a Labyrinth is built using a Maze as a blueprint, as my cousin explained this in his notes, it became clear why, Sir Isaac Newton found things in the Torah that were written like a Maze, and if it was not for John Nash, who had a Beautiful Mind, and was also Autistic, and like myself, Schizoaffective, and at times he got Schizophrenic, whereas I only get that way in my dreams, that might confuse some people, but I have a rare sleep disorder known as Dream Misinterpretation, this is due to a condition I suffer from, Hypotension, when I fall asleep, my Blood Pressure can drop below 90 over something, and stay there till I wake up, then it only raised to around 100 over something, so I could run 5-miles and my blood pressure only got up to around 120/60, at rest around 100/50, and when I fall asleep around 86/46, and I get low to no REM sleep, and I have Periodic Limb Movement, so basically I dream I am awake just lying in bed, if I got up and tried to go anywhere, things would get strange, like nothing was real, when it first started to happen for the first time, I was in Kuwait in Air Rescue as a Helicopter Crew Chief, and that is when these Mazes that Newton would create in math found in the Torah would come into my mind, just after falling asleep, and if I got up to go anywhere I was in a Labyrinth, and I had to use Math to find my way out, so what got me interested in Newton, turned into my nightmare when I got older, but as it turns out, Nash also had these nightmares, and worked on Newton's Maze equations, and that might have been what pushed his Schizoaffective into Schizophrenia at times, he said medicine never helped, he thought about this math and wrote new formula's based on it most of his life, it was the one puzzle he could never figure out, how do you get out of it, and why did the Torah put a Puzzle in it, that has no way out, and the answer is Hell.

The Puzzle in the Torah, spans through many pages, each cell has a letter in it, each letter has a specific numerical value, there were borders drawn around each cell, they would have a Square, Triangle, and Sphere, Kepler worked on this Puzzle till the day he dies, he thought it had to do with the way the Universe was modeled, from what I could learn from it was that the Sphere is like our Galaxy, nothing can go outside of its Sphere, the Square is like a Sun, it can move around inside the Sphere, and the Triangle is like our Planet, it can only orbit around a Square, and the Math Symbols drawn around each cell, represented a coordinate in space, but if you run the math equation, you only go around an endless cycle of orbiting the same objects, so Kepler was right, but it took Nash to figure it out, but if you ask me, it almost drove him insane.

When it comes to figuring out Puzzles using Math, we call this Game Theory, and John Nash was a Wizard at it, he said he got interested in Math after reading about Kepler, Galilei, Franklin, and Tesla's Puzzle, it seems this puzzle has been the study of many over the years, and after Nash Solved it, he was Puzzled by it, because it is an equation with a set of rules that control its every move, and just repeats itself, and that is all it does, but that is all our Galaxy does, and finding the Game Equation to solve this Puzzle, led me to figure out the Trinary Math of the Universe, and with it, I can figure out what Track all the inhabitable planets can be located, I call this a Galaxy Calculator, it does not use the Math of Nash, or anyone else, it was what I came up with, after years of studying Nash's solution, which was leading me nowhere till I found a letter from Henrietta Swan Leavitt, in with Nikola Tesla's notes, and she said she figured out we are on Track 666, and then going through all her notes, I realized those Dark Spots, are Dark Stars, after looking at thousands of images of Star Fields of the same area of space, I was able to find the pattern she wrote about to Tesla, and realized that is what Nash's solution was showing, endless movements around a central object known as a Galaxy, so why the Torah encoded this as a Puzzle that Puzzled all the greatest Wizards & Witches in History, it is clear that the way they write is not like the way we write, we humans know we have at least 3 different types of brains, we call this Neurodiversity, this allows us to view our Reality differently, so who wrote the Torah is a mystery, the pages tell one story, which is do-not pay any attention to what the pages say, they are encoded using grid locations, and they go deep into pages and sometimes span between Canons, and all in the Page Border Artwork, which is amazing, but that was the Torah before the 4th Century, after that, they did-not use any of the original page artwork, so all that knowledge was lost, and it was where all the Science was, and why the Torah after that Century is only a Book of Sin.

I remember when I was in Kuwait and got stuck in a market place during Pray time, and a rug dealer invited me and the others into his shop, so we did, and he closed down the door, and we sat on rugs, and drank Turkish Coffee, as we talked, I noticed his Quran, or Koran, depending on the translation, and asked him about it, he showed it to me, I did not touch the pages, I just looked at the Artwork and said I have never seen this Page Artwork before, he said when he was a child his father made him make a copy of it by hand, and when he was completed his father was furious at him, and told him he had to do it over, and this time copy the Page Artwork exactly as it is and do not make it up, and his father was never happy with his work, and after he died, his fathers family took his copy of the Koran, and now all he has is one without the Artwork, and that was where all the hidden secrets of Koran were hidden in plain sight, and know all the version I have seen of it have different Artwork, much like the Torah after the 4th Century.

There are countless books written about the Torah or Bible Code, it has been found in the text, only not in the parts where the Church Altered it to insert Jesus Christ, so this Puzzle that is in

the Torah is a well-documented fact, so I will not get into that here, you can research this, and find out what can be found in the Torah after the 4th Century.

Countless people in History have worked on the Torah Code Puzzle, and how it goes not only horizontally and vertically, but that it does so through pages, and into other Canons, and that means it is encoded in 3 Dimensions or 3D, and that is amazing considering it still can be read normally, although those stories are not important, they were just made up to create this Puzzle, so those who study its stories have no clue why they make no sense, and why people are always rewriting them, and you lose everything if you translate it, it was all the way it was written on the pages did the Torah make any sense, and you have to make perfect copies of them by hand for thousands of years, and if someone made one mistake, it would make the book worthless, and the Artwork was very hard to copy, it was geometric shapes, that had encoded meaning, and the exact location was critical since this is a 3D book, talk about a Puzzle book.

Sir Isaac Newton said that the Pyramids were not built by those who wrote on the Walls, proving that History was written by Graffiti Artist, he said the Pyramids were not Tombs, they were Machines, and nowadays most people understand how they took in Saltwater from under the Pyramid and broke it down into Hydrogen and Oxygen, and they burned them to create Electricity and Pure Water, so the Pyramid was a Puzzle that needed to be solved, and it was, yet few know about it, and why is simple, Mainstream is not talking about it.

If you find something that Puzzles you, there is a reason for it, and once you find that reason, you will understand why it was Puzzling, and some Puzzles like the Ancient Stone Monuments, are the Greatest Puzzles ever built, and all of them have Graffiti on them, not put there by the people that built them, so the History being told about them, is just the History of the Graffiti Artist, and when the Human Race goes extinct, and another race of so-called Intelligent Beings discover all our Graffiti, what will they think about our Society, they would believe we were insane and would be right, our Graffiti is senseless and demeaning to the human race, as was the Graffiti as well as making them into Tombs, is just insane, and only Insane-People would do such a thing.

Sir Isaac Newton talked about growing up with all these thoughts running through his mind, and no one having answers that he believed, and I grew up the same way, I would get into trouble for telling Teachers Einstein was retarded, and growing up telling people how retarded a Floating Point Central Processor is retarded, no one cared about my opinion, everyone always thought they were more Intelligent then me in the Flesh, and why I normally did not talk about these things to people, knowing how crazy they get once I mention Jesus Bar Abbas coming back in my Flesh, knowing Sir Isaac Newton said the same thing, and for the same reason, it is true, but people do not care about the truth, and why it is better to teach empty class rooms, then to try to teach empty heads, and that is all Sheep are, somethings never change, and why some Puzzles

are only Solved by Wizards like Newton and Nash, but believing that this Puzzle the Torah left us, meant something, for some reason Nash was disappointed in his findings, as he put it, it just goes round and round, but to find the Math that explains this, that was not easy, and Nash knew that all the Wizards believed this was the key to how the Universe works, and why from Kepler, to Galilei, to Newton, to Franklin, to Tesla, and finally to Nash, has this one Puzzle been so important to understand, and why was Nash disappointed in this finding, still puzzles me to this day, my guess is that he believed the Universe was more complicated than $(+1) + (-1) = 0$, because that is what this all reduced down to, once you graph this *function*, you find out it is just a repeating Sine wave-form, only this one could be used to calculate where life exists in the Universe, and Nash did not make that connection, I have no idea what he was expecting, he only wrote about his bitter disappointment with it reducing down to a truth table, so he dismissed it, putting it out of mind.

The greatest Puzzle in Life is figuring out what the Universe is about, and how we view Science is how that Puzzle fits together, and learning the Math behind that Puzzle is the greatest lesson you can learn in solving that Puzzle, and when it comes to Game Equations, John Nash was a Wizard who figured out the greatest puzzle of all time, and few even know about it, because they never understood it, only Autistic people with a high IQ can, the Next Step is number 28, where I talk about a Paradox, those things that cannot happen in Reality.
