

# Trinary Science

By

*Jeffrey Scott Flesher*

Trinary Science is a special type of science that is defined by the 3 Logical State changes in Atoms that have been identified under an Electron Microscope, I will call this type of Atom a Trinary Atom, because I can define these 3 Logical State changes as: Solid, Semisolid, and Invisible. The word Trinary means 3, and there are 3 types of Atoms: Proton, Neutron, and Electron. The Proton and Neutron make up all the Elements in the Periodic table of Elements. Electrons always orbit the Proton and Neutron. There are 3 Valance Rings around all Elements, these 3 Rings are imaginary paths that the Electrons takes as it orbits an Atom. To quantify these logical State changes, I assign +1 to the Matter Solid State, next I assign -1 to the Semisolid Antimatter State, and the last State of Invisibility I will assign to 0 and call this our baseline. To visualize this, I will write these 3 states on a graph, with the +1 on top, 0 in the middle, and -1 on the bottom. The graph below is what I refer to as the Trinary Timeline, I will add columns of states represented by an asterisk sign \* to signify the state the Trinary Atom is in, and a dash – to signify states it is not in and make it easier to visualize. The timeline below is a blank timeline, I call this a Trinary Timeline of a Flat-Line Graph representing the beginning and ending of all life cycles, because all life is made of Trinary Atoms with Light without Darkness inside them.

```
+1 -----  
0 -----  
-1 -----
```

## Trinary Timeline of a Flat-Line Graph

I will call this a Trinary Flat-Line Graph because it has no state changes, this is both the beginning of life as well as the end-of-life cycle, I call this a dead state, because if this was a brainwave, you would be dead, maybe not born yet, but not alive yet. A brainwave and the state changes in a Trinary Atom are the same thing, and I will use this terminology to prove this. Trinary Atoms make everything we can and cannot see at the same time, because at one time everything made of Atoms was made from something else, and those Atoms just keep getting repurposed, we grow food in dirt made of those other things, I call this Dirt Earth, and Earth is also known as Ground, and is the same as our Baseline which is also known as Ground or Mother Earth thus Trinary Science is the science of Earth.

Trinary Atoms have Light without Darkness inside them, and all Life is created from Atoms, so let us first look at life, so we can understand death. All life begins with the first brainwave, which begins after the first heartbeat, and that all starts from the Spark of Life represented in the graph below, and everything has this same type of graph, because Light is Everything, and I will call this a Trinary Energy Graph, and I will show that Atomic State changes, are what drive this waveform, thus at the Atomic Level, Energy is driven by Atomic State changes. I will look at the Graph of a Trinary Atom as it cycles through a standard sine waveform, each – and \* represent a time frame when something is happening, and where it is happening, in time frame 1, I have a column of -, this is the Flat-Line seen above, and in time frame 2, you see we have a \* on the middle line of the graph, if it stayed there this would also be a Flat-Line, so let up look at a normal sign wave, so I can put this graph into context.

```

+1  ---*-----*-----
    0  -*---*---*---*---*--
-1  -----*-----*-----

```

## Trinary Energy Atomic Life Graph

Life starts with an Egg & Sperm, when they first encounter each other, a Spark is created, this is a visual Light that can be seen, and has been photographed, so I will use this analogy. The Trinary Atom Life Graph represents energy, it takes Energy from the Atom to change from + to -, or Positive to Negative, these changes correlate to the overall energy level of the sign wave of Life, and why we can use this graph to plot not only the Atomic Level State changes, but also our brainwave, heartbeat, temperature, chemical balance in our blood, as well as every bodily function you can think of, as such, Trinary Atoms are the building blocks of all Life.

Trinary refers to the 3 Logical State changes in Atoms that are visible under an Electron Microscope, as such, the Trinary Atom Life Graph, represents the changes of each Atom, and everything is made up of trillions of Atoms, yet the overall graph does not change, because they are all Synchronized. The Logic of Synchronized Atomic changes, means that all our Atoms in our body are all changing states, but in a synchronized way so we do not disappear. We can see this synchronicity in the Trinary Atom Life Graph, the state changes will follow this simple sign wave form, for the life cycle of that Atom, and one day that Atom will go into the 0 state, and never come out, and a Neutrino Detector can register this event, because all Atoms are made from Neutrinos. Neutrinos are unbound Atomic Particles, the process of binding Neutrinos to form an Atom is called Synthesize. The process of synthesizing an Atom, involves Fusion, or Synthesis, which is the process of combining two or more distinct entities into a new whole, whereas chemical synthesis is the artificial execution of chemical reactions to obtain one or more products, as such, Atoms can be manufactured. The first problem with manufacturing Atoms is the size of the Neutrinos, currently we have nothing that can hold them, they are so small they fit between the spaces in any Atomic Structure, so you must attract them. The second problem is binding the Neutrinos to the Light without Darkness, this requires a lot of knowledge, this is not a brute force process, and I must point out that Electricity is made of Atoms, so you cannot use it to create itself, nor any type of energy you know of, you have to will them into existence, that is how Atoms are created, just as our Atoms make us, and our brainwaves make up how we think, and what we remember, it is that Spark that started our Lives that is called a Soul, or Spark Of our Life, and is only the Trinary State Logic changes, and only this connection with the Light without Darkness can you create this bond between Neutrinos and the Light without Darkness, we think using the Light without Darkness, it is Life, and how everything in the Universe came to be, willed into being by the Light without Darkness.

To understand Electricity, you only need to know one thing, it is the Energy of our Soul, so it is Soul Power, and there is no getting around this aspect of Trinary Energy, because we have only one set of rules that define Trinary Atoms, and that is Life, everything made of Atoms was once a Life, maybe not life as a Human, but Life as something. Sir Isaac Newton quoted the Torah and said God is All Light without Darkness, and that God is the Force of Gravity in all this Equations, like  $F = MA$ , where F is the Force of Gravity in terms of M for the Light without Darkness inside the Mass of Atoms times its Acceleration, and to find out how much Energy that is, take  $E = (MA)^2$ . Nikola Tesla said we are Light Beings, and that everything is Light, he also said people are Satanic for following a Shepard, taking the Mark of that Beast known as a Sheep like Ewe who Buys & Sells Souls by the Kilowatt. Newton calculated the End of Time to complete in the year 2061, in 2033 our Atmosphere vents into Space. Trinary Science is the Science of God, and the Torah is a Science Book about God.
