

## Step-08: Eternity

Think about Eternity for just a moment, it is not possible for humans to fully understand the concept of Eternity, because of all the factors that go with it, and that includes me, but I am the one writing about Eternity, so you would hope I at least have a clue, so let me give you a clue, for starters it has no beginning and no ending, it does not exist as a quantity of Time, and it does not imply a set amount of time, what might seem like an Eternity to me, might just be the age since my beginning, but if God created the Universe, and we know from the Torah that God is All Light without Darkness, and in the Beginning there was only Light, and that means no Atoms, nor Eves, just Light, and that lasted longer than what I could contemplate as a long time, how much time elapsed for God before God figured out God could make the only thing that physically existed in the Universe known as Neutrinos, into Atoms, and how long did it take God to make something out of that Atom, and the thought of time in terms of Eternity, takes on a concept we as humans were never meant to fully understand, but we can get clues, and I will try to give you a clue without taking all Eternity, so I will only talk about the Torah written before the 4<sup>th</sup> Century, but it might apply to the Torah written after the 3<sup>rd</sup> Century as well.

In Trinary Science we have Trinary Time, this is the time it takes an Electron to orbit  $1/137^{\text{th}}$  the distance around a Hydrogen Atom, which is a very short period of time, but at the same time, must have taken God an Eternity to figure that out, considering it had never been done before, so God had nothing to compare it to, and God had no one to Talk to, because there is only one God, and for all we know, our Universe is just Atoms that make up God, and maybe what might seem like an Eternity for me is just a second in time for God, so there is no way of proving the truth about God because Humans Intelligence only gets you so far, and when you reach that limit you do not make stuff up, you have to prove what you can, and admit what you cannot, but never make into God anything that God is not, or God could never be, and since God is All Light without Darkness, that is all God can ever be, and nothing else, and we know God created Atoms, I call them Trinary Atoms to mean they have 3 Logical State Changes seen under an Electron Microscope, we know there is a Solid State, where the Positive Matter is in all 3 Dimensions of Width, Depth, and Height, and the Torah said in Trinity that this is the Father, and when we see Son turn to a Semisolid State, where the Negative Antimatter is only in one or two dimensions of Space, and when it is Invisible, this is in the 0 Dimension of Space, also known as God's Ground, it is Dimensionless Void of Null-Space where the Atoms Neutrinos will collapse, thus becoming Invisible because we cannot see the Neutrino Particles when their Field is collapsed into 0 Dimensions, we can only see in 3 Dimensional Space, but at this point in God's Evolution, I have to use Logic and Reasoning to figure out what order God needed to create things, in order to create the Universe, so I have to think like God, I know I am made of Atoms with God's Light inside them, but also know I cannot think like God or I would know all this stuff instead of having to try to figure it out, so an Atom seem like a Logical place to start, and thinking like God I would imagine I need to make a lot more Atoms than just Hydrogen.

I would make all Atom to have 137 sockets where other Atoms could connect, and I would use the number of Protons and Neutrons to activate the number of sockets available for each type of Atom, based on the number of Protons it had, and I would give each 3 Power Rings we call Valances, to allow Electrons to bind Atoms together so I, meaning God, or the Light of God, meaning me, which is short for Meat and called Flesh, and that is my Legal name, and since God created me so I could try to explain this to you, so from the viewpoint of God, Electrons were like crazy glue, so Alchemy was born, we know this a Chemistry nowadays, but it is Science, and in the Torah it told how God created the Atom, it said that God, also known as All Light without Darkness, would concentrate a lot of Light till it was hotter than the Sun, and this would attract Neutrino Particles to form around it, and with what the Torah called a Soul, which means the Light of God with Freewill, Intelligence, meaning it can think just like we do, and for the same reason, we are Light Beings, just one Atom in our body at conception, that Atom grows into Life, so the Atom was one of God's Greatest Accomplishments, but God realized they were limited in Size, so God created a larger scale version of the Atom that I call a Trinary Engine, with this God created the Galaxy, Sun, Planets, and Moons.

What Nikola Tesla viewed as Electricity he said was our Soul, we are all Light Beings, and Everything is made of Light, and it takes Electricity to make Light, and we are that Light, and that Light is what the Torah called God, so for the Torah to talk about Eternity in terms of Gods perspective, is something we as Humans could never fully understand, but here is a clue, God is Light without Darkness, and we know the Darkness is the Rainbow of Colors found in the White Light of the Sun, so God is only Light not in the Visual Spectrum of Light, and why the Atom with Protons and Neutrons do not have Light we can see inside them, and why they look Invisible, but God is not just inside the Atoms, God is all the Light without Darkness in the Universe, and that is Eternity, it has no beginning and no end, to understand this, think of a memory card in a computer, say we have one memory card that we will call the Human Brain, that is one Atom in the Big Picture called Eternity or the Universe since they both mean the same thing considering Eternity only applies to the Universe, nothing else will last for an Eternity, nothing was ever meant to be an Eternity, other than the Universe, proving everything is Light, as such, all the Memory Cards that God has made while God was creating the Universe is nothing compared to God since the Light of God is inside all those Atoms as well.

God is Light therefore God is the Universe proving God is Eternity, so our understanding of Eternity must start with God, and our understanding of who we are, starts with Trinary Atoms, as our understanding of our Universe starts with Trinary Engines, and those do not last for an Eternity, and why we will never fully understand Eternity because we can never fully understand the Universe, we can understand God Physically Exists as Light, adding the without Darkness part to it, does not change it, there is Darkness without Light, but the Light is everywhere, so you cannot have Darkness without any Light, because without the Light the Darkness would not exist as anything but dust, considering the Darkness means the Neutrinos that the Atoms are made up of, and that Darkness will last an Eternity since it is the Universe, as such, God is the Light and

Neutrinos are the Darkness, so we can get clues as to how Eternity works, know that only the Light and Darkness are Eternal.

The Torah said you cannot have the Darkness without the Light, to understand why this is true, you need only to understand all Atoms are made of Darkness known as Neutrinos and Light, although Neutrino Particles exist, they do not exist as anything but Dust in the Wind, they exist but exist as nothing, ashes to ashes and dust to dust, so all that we see is made by God in the form of Atoms, yet God lets us make things with those Atoms, and maybe that is the only reason God made us, but God made us to be Intelligent, yet History proves few called Wizards existed, we know Jesus Bar Abbas was the Wizard who the Witches wrote about, and how he defeated the Roman Empire, and people like Kepler, Newton, and Tesla, and since Tesla there is only me in the Flesh, born on the day Tesla even wrote it would happen, but the truth is that I wanted to or I would not have done this, and like Newton, it was my Duty, as it was all the Wizards and Witches throughout time, just like it was the duty of the Church and its Armies and Members known as Religious Sheep like Ewe to Murder or Discredit all the Wizards and Witches for telling the truth about the Torah, and why those now out of the Closet Gay Pedophiles teach Light is Good and Darkness is Evil, knowing God does not Physically Exist in their Religion to a Deity God, and God does not Exist in the Science of Einstein they endorse as Mainstream Science and Religion, proving that the Church only Worships Money.

The way Computers work is similar to the way our brain has to make decisions based on facts, and do math, but its ability to think is based on Memory, and that is based on let's say one Atom per bit, and think about how many bits or Atoms you need to think, now think about God, who is just Light, and not Atoms, but the Light inside those Atoms, and as Atoms move through the Universe, that Light inside them does not move, in fact the Atom only moves while in the 0 Dimension of Space where its Neutrinos are collapsed, and therefore its Light is not bound to the Neutrinos while it is moving, and that is so the Atom does not burn up due to friction while the Universe is moving at the Speed of Light, which is actually at the speed we perceive Light moving, but in reality we know Light does not move, but our Brain is an Analog device that does not store information encoded as bits, it is encoded as an Analog Electrical Signal, somewhere outside the brain, in a place I call the Galattice, because if I was thinking like God I would want a way to record what I thought, and the Galattice is the only Logical solution I could come up with, and if God needed a way to remember things, why not make all Lifeforms the same way, only Freewill makes them view only their memories stored there, more of a way our brain is tuned a specific pattern that makes us individuals, proving God knows what we are thinking.

If you think like God does, you have all the Light in the Universe to think about everything in parallel, and I imagine God's Memory I call the Galattice is similar, it exists somewhere in the universe, and made of Neutrinos and Light, I have often wondered about the Evolution of a Galaxy, and I know Henrietta Swan Leavitt was more Intelligent than her boss, Hubble, who

they named the Telescope after, all because Hubble supported Einstein's insanity and Henrietta did not, she thought that there is just one type of Galaxy, a Spiral Arm, and different stages of development it will take on a different configuration, and the Galaxy can even become a Dark Star, and that is where I got my concept for Dark Stars, and I did not need to change her model of them, I just added Trinary Science to them, she wrote that the Force of God can be seen everywhere once you know what you are looking for, and the pattern she found was that we are on Track 666 if looking at our Galaxy like a Record Player, as a flat plastic disk that has grooves in it, from that I was able to write the Trinary Math Formula to Calculate a Galaxy based on the Size of its Sun, you can find it at [GitHub Light-Wizzard, galaxy-calculator](#).

The Trinary Science of the Trinary Universe is that only 3 things exist: Space, Light, and Neutrinos, everything else is made of those 3 things, and Trinary Math of  $(-1) + (+1) = 0$ , can be graphed as Sinewave, as I have shown in previous Steps, so you can fully understand Trinary Science, because it is not complex, Trinary means 3 Logical State Changes, we know they exist under an Electron Microscope, and the Math fully explains it, and it did not take an Eternity to explain it, and I gave you a few clues about Eternity, and the Trinary Science behind it, is simple, in the Beginning there was Light, and God created everything from Neutrinos and Light, no more complicated than that, Light is Static, and Neutrinos are Neutral, and the Universe moves at what we perceive as the Speed of Light, Neutrinos only move in the 0 Dimension, and the Light inside the Atoms that are made of Neutrinos do not move, only the Universe moves, and it is dynamic, meaning it moves from the viewpoint of all Atoms, the Universe does not have a Direction it moves in, it moves in all directions away from Trinary Atoms or Trinary Engines, this is because in the 0 Dimension nothing has any Dimensions to move in, yet it is the only time the Atoms Neutrinos can move, and how they move Dynamically from the center of their origin, they know which way to move by their Polarity going into the 0 Dimension, and the Universe causes them to move, as such, the Trinary Engines get dragged through Space by their Mass, the Universe is made up of Dimensions that have width, depth, and height, to understand how Gravity works, you need to understand the Galaxy is a very large Trinary Atom known as a Trinary Engine, so the same rules and laws apply to it, by itself if there was nothing else around it, it would orbit the nearest mass no matter the distance, our Suns have one Dark Star, and a fix number of Trinary Engines, that the galaxy-calculator can calculate base on an engine required for every track, as such, Track 666 requires 333 Trinary Engines, these are what I call Dark Star Companions, these orbit between our Sun and our Binary Star Sirius, as it chases us around the Galaxy, at times on the opposite side of the Galactic Disk or Plane at times, the Frequency of the Track sets our pace around the Galaxy, ours is 30 MHz, causing us to go through the Galactic Disk every 30 Million years, the Frequency of Earth is 6.66 Hz, and why it orbits our Sun sideways as it is moving forward, at an average speed of 66,666.666 Mph, so the Trinary Math that is used to Calculate it, is very simple, it is "The Principles of the Trinary Universe", whereas Mainstream Science is so complicated that people believe they understand it, when there is nothing to understand since nothing exist in these Alternate Universe in their Alternate Realities, since Einstein removed God that is All Light without Darkness found inside Atoms.

Eternity is measured in Time as Infinity is measured in distance, the Universe only has 3 things in it, Space, Light, and Neutrinos, and we can say Space and the Light that fill it, is Infinite as well as Eternal, but Neutrinos are only Eternal, since there is a fixed quantity, and it never wears out or gets old, it is recycled for all Eternity, whereas Mainstream Science is measured in terms of BS, and their BS will last for an Eternity, and their Stupidity is Infinite.

Space might be Infinite in all directions, but you could not fly a Spacecraft from one Universe to the next, nor could an Asteroid or Comet or any other object make it between Universes, once two Universes start to merge, you could not travel from one to the other till they had merged at the point you would try to cross, even then it would be extremely unlikely that an Asteroid or Comet or any other object could make that journey till the merge was at least half way completed, due to gravity, and it is unlikely any collisions will happen during the merge, the debris fields will collide since they have no other choice, but I do not see Stars or Galaxies colliding during a merge, I have never seen any photographs showing such events, just a lot of theories, and Computer Generated Animations of what it might look like, which I would not believe since it is based all on Theories never proven, they use Atomic Cores, or Gas Filled, both are insane concepts that only retarded sheep would believe, but that is Mainstream Science and Religion for you, nothing but Lies that you have to pay for to call it Freedumb.

Why the Church wants your Soul is a question only you can answer, we know from a Scientific viewpoint that our Soul is just Electricity, therefore the concept of Heaven and Hell comes into play, we know both places exist, and you can find Souls in both of them, so we know this is the truth so far, but what about God letting you into Heaven, is that just a Legend or is it true, is something no one alive will ever know, and if there is only one God, when you die you become that one God, and maybe that is how God knows if you deserve to Live in Heaven, or if you are going to be Evil in Hell, the Science of God Judging Lifeforms this way, is that God would only be judging God, yet we have very few Souls in Heaven compared to Hell, so it is your call how you want to live your life, but do not say you have Freedom when it cost you Money you know is Treasonous, and never believe Religious People are good people, I see no proof of it in this world, all I see is a lot of People who will not make it to Heaven, so for a brief time as a Lifeform, they will Sell their Soul to Satan and spend the rest of their existence in Hell, all because of the Church and its Members who are nothing but Treasonous Money Junkies.

To Rule by Fear is a tactic used by Satan, another is to Trick you with Words & Spells, like Anagrams: Satan, Santa, Saint, the list goes on since Satan has many names, Money is one of them since the Torah said only Satan uses Money, but 4<sup>th</sup> Century Lie made only the Love of Money a Sin and made Sinning easy to do, just say a few Hell Mary's and Souls will get there

after they die, and that is what Eternity is all about, how we will spend it in Hell for using Money, and that is all Churches care about is Money.

The Church has never changed in thousands of years, they use the same Money they used to Pay the Roman Army to Murder Jesus, and got all of them Murdered for Free, that being all those in the Church and all their Followers that will go to Hell for those Murders, do not ever expect me to talk nice about them after two thousand years of Murdering Witches & Wizards for telling the truth about the Church and its Satanic Money, I have nothing but contempt for their kind, they try to justify Money knowing it is Treason the worse of all Crimes to commit, and that money you use makes you guilty of every crime ever committed by it, and that is a lot of Crime.

Regardless of if you believe you have a Soul, or that it is Electricity that makes our Light, once you die you will find out, and there is no coming back from the dead, near-death experiences are nothing like being dead, once your Soul leaves your body you are not going to get back into it, and technically you have to be dead 3 Days for it to count, so make sure that you do not believe in the Afterlife before you go Selling your Soul to Satan because Eternity is a long time.

Lightning is proof that God sends Souls back to Hell, and that cannot feel good, so to understand how Space can be Infinite as well as Eternal, you would have to take a trip into Infinity which would take you an Eternity, but the Universe is not designed in a way you could take that trip in a Spacecraft, you would end up going in a circle for all Eternity because Space is broken up into corridors of Space, the center of the Universe is always inside of you, so as we learn about the Trinary Universe, we learn about Time and Distance, in terms of Eternity and Infinity, and know the Trinary Universe is both, and in the next Step 9, things get Upside Down.
